PROFESSIONAL SUMMARY

Aspiring Software Developer and MCA graduate with skills in Java, Python, SQL, React, Data Structures, and Backend Development. Experience building academic and personal projects involving recommendation systems, web applications, and computer vision. Strong problem-solving, debugging, and teamwork abilities.

EDUCATION

Master of Computer Applications (MCA) [8.6 CGPA]

Graphic Era Hill University | 2023–2025

Bachelor of Computer Applications (BCA) [69.5 %]

Surajmal Agarwal Degree College | 2019–2022

TECHNICAL SKILLS

Programming: Java, Python, C, C++, C#

Web: HTML, CSS, JavaScript, React, Tailwind CSS, Node.js

Database: MySQL

Libraries/Tools: Pandas, NumPy, Matplotlib, OpenCV, TensorFlow

Concepts: OOP, Data Structures & Algorithms, Computer Networks and Security, Agile

Other: Linux, Git, GitHub, Power BI, Tableau, Android Studio(java)

PROJECTS

Entertainment Buddy

- Developed a movie, anime, and TV-series recommendation system using K-Nearest Neighbors (KNN).
- Built an interactive Streamlit web application.
- Optimized data processing using Pandas and NumPy.

Personal Dashboard

- Developed a React-based dashboard for organizing and tracking professional interactions and contact information.
- Built reusable UI components and implemented state management for efficient data handling.
- Designed a responsive and user-friendly interface using React, JavaScript, HTML, and CSS.
- Improved information accessibility by centralizing professional records and interaction history..

Safe Drive Application

- Developed a Python-based driver monitoring system using OpenCV and computer vision techniques.
- Implemented face and eye tracking to detect driver drowsiness and reduced attention levels.
- Built a real-time alert system to enhance road safety and prevent fatigue-related accidents.
- Applied image processing and facial detection algorithms for accurate monitoring and analysis.

MotoBuddy Application

- **MotoBuddy – Vehicle Enthusiast Social Platform (under development)**

Technologies: Java, MySQL, Android (planned), Firebase (optional)

- Designed and developed a social platform for car and bike enthusiasts to register, manage, and showcase multiple vehicles.
- Implemented user authentication, profile management, and vehicle registration with detailed specifications, modifications, and photo galleries.
- Developed features for uploading cinematic vehicle photos, sharing posts, interacting with other enthusiasts, and building a community-driven experience.
- Designed a scalable database structure supporting multiple vehicles per user and categorized content for cars and motorcycles.
- Planned future enhancements including event management, vehicle clubs, marketplace integration, maintenance tracking, and cross-platform mobile support.

CERTIFICATIONS

Python Programming – CodSoft
Digital Marketing – Adobe / Coursera

SOFT SKILLS

Problem Solving, Communication, Teamwork, Collaboration, Time Management, Organization, Active Listening, Adaptability, Gaming reflexes .
